

Introduction

Millions of children with disabilities around the globe continue to be left behind, despite the near-universal ratification of the Convention on the Rights of the Child, the call for action embedded in the Convention on the Rights of Persons with Disabilities and the clear mandate set by the Sustainable Development Goals. Primary education or elementary education is typically the first stage of formal education, coming after preschool/kindergarten and before secondary school. Let us now study how it differs for children in the official right age group.

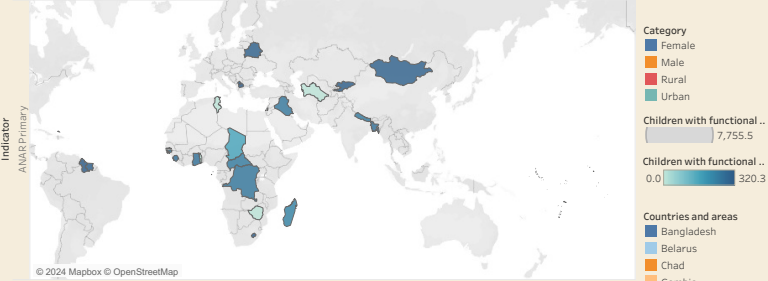

Children who attend primary school with functional disability

Development regions in country for disable children who attend primary school

Children who attend primary school without functional disability

Children out of primary school with functional disability
